CARLOS ANTONIO GÓMEZ HERNÁNDEZ

FULL STACK DEVELOPER | .NET • REACT • NODE.JS • AI-ASSISTED ENGINEERING

Aguascalientes, Mexico | (+52) 449-348-3339 | ing.gomez.hernandez.carlos@gmail.com | LinkedIn | GitHub | Portfolio | teseract.io

PROFESSIONAL SUMMARY

Computer Systems Engineer graduated from **Universidad Autónoma de Aguascalientes** with 4+ years of hands-on experience in full-stack web development. Proficient in architecting scalable web applications and RESTful APIs using **C#, .NET Core, React, TypeScript, and Node.js**. Experienced in leveraging modern AI tools and autonomous **AI agents (Gemini API, Claude, Copilot)** to accelerate feature delivery, automate test suites, and refactor codebases efficiently. Proven background in Agile/Scrum delivery, enterprise systems, and consulting on bespoke software projects via **Teseract (teseract.io)**.

TECHNICAL SKILLS

- **Backend & Languages:** C#, .NET Core / .NET 8, ASP.NET, Entity Framework Core, Node.js, TypeScript, JavaScript (ES6+), Python, REST APIs, Microservices, Clean Architecture, SOLID Principles.
- **Frontend & UI:** React, Angular, Blazor, HTML5, CSS3, SASS, Tailwind CSS, Responsive Design, State Management.
- **AI & Agentic Engineering:** AI-Driven Development, AI Agents & Tool Calling (Gemini API, Claude, OpenAI), Prompt Engineering, GitHub Copilot / Qodo, Automated Code Review & Refactoring.
- **Databases & Cloud/DevOps:** SQL Server (SSMS), MySQL, PostgreSQL, Docker, Git/GitHub, CI/CD Pipelines, Azure, AWS.

PROFESSIONAL EXPERIENCE

Full Stack Developer | Corporativo RAINDE S.A. de C.V.
Jul 2026 – Present

- Develop and maintain enterprise web and e-commerce platforms using .NET Core, React, and Node.js.
- Integrate AI-driven development workflows and automated agents to streamline feature implementation, code analysis, and testing.
- Design and optimize RESTful API endpoints and relational database queries, improving system reliability and response times.

Software Engineer (Associate / Projects) | Teseract (teseract.io)
2024 – Present

- Collaborate in the technical design and delivery of bespoke digital platforms, modern web systems, and point-of-sale solutions.
- Lead end-to-end full-stack feature delivery, working independently or with cross-functional team members to solve diverse business needs.

Full Stack Developer | Grupo SINCO
Dec 2022 – May 2026

- Served as primary developer delivering scalable enterprise web applications across iterative Agile/Scrum sprints.
- Developed full-stack web solutions utilizing C#, .NET Entity Framework Core, Blazor, and Angular, ensuring high performance.
- Designed, tested, and deployed secure REST APIs; established client unit testing and continuous production releases.
- Incorporated LLMs and AI agent assistance into daily development routines for rapid bug triage, code refactoring, and commit verification.

QA Automation & Support Engineer | Lion Intel
Aug 2022 – Dec 2022

- Delivered production support for high-availability e-commerce applications, ensuring prompt incident resolution.
- Engineered automated test suites using Selenium with Python; executed functional, acceptance, and regression test cycles.

FEATURED PROJECTS

- **Loyalty & Rewards Web App (2025 – 2026):** Full-stack web application enabling food and retail businesses to register customer visits and manage points-based digital rewards in real-time.
- **Service Cancellation & Reports Manager (2026):** Enterprise management tool for tracking cancellation metrics, automated report generation, and status alerts.
- **Task & Operations Workflow Manager (2025):** Scalable task orchestration and team collaboration tool built with React, Node.js, and SQL.

EDUCATION & LANGUAGES

- **Bachelor's Degree in Computer Systems Engineering** – Universidad Autónoma de Aguascalientes (UAA)
- **Languages:** Spanish (Native), English (Professional Working Proficiency - B2), French (Basic)
