ABOUT ME

Computer Systems Engineer with over 4 years of experience in full stack development, delivering dependable and efficient web solutions. Skilled in a broad range of technologies —including C#, .NET Core, ASP, Angular, Node.js, TypeScript, MAUI, Python, and SQL—I have consistently applied my expertise to create scalable and innovative applications. My professional background includes designing and implementing REST APIs, which has allowed me to address complex requirements with creative and effective solutions. I am also experienced in integrating development processes with cloud platforms such as Azure and AWS, where I leverage CI/CD pipelines to streamline deployments and uphold high-quality standards. Beyond technical proficiency, I am committed to providing clear and attentive support, ensuring that clients maintain confidence in receiving reliable, high-quality software. Driven by a passion for technology and continuous improvement, I approach every project with dedication and a focus on long-term value.
